Name _____     Date _____

# Decoding a Message

Take an encoded message from another classmate and decode it by using an encoding table to convert each 2 digit hexadecimal code back into a letter, number or punctuation mark.

What does the decoded message say?

_____     _____     _____     _____     _____     _____

_____     _____     _____     _____     _____     _____

_____     _____     _____     _____     _____     _____

_____     _____     _____     _____     _____     _____

_____     _____     _____     _____     _____     _____

_____     _____     _____     _____     _____     _____

_____     _____     _____     _____     _____     _____

_____     _____     _____     _____     _____     _____

_____     _____     _____     _____     _____     _____

_____     _____     _____     _____     _____     _____

_____     _____     _____     _____     _____     _____

_____     _____     _____     _____     _____     _____

_____     _____     _____     _____     _____     _____
